The following is an examiner's statement of reasons for allowance: The prior art of record does not appear to disclose or suggest a motivation to combine a surgical device extending along an axis and having a proximal end and a distal end, the device being operable to move a suture through body tissue, comprising, inter alia:  
an elongated shaft having a hollow configuration; a handle assembly coupled to the shaft; an actuating rod being disposed to extend between the handle assembly and the shaft; a needle assembly disposed at the distal end of the actuating rod and movable back and forth with the actuating rod between and extended state and

retracted state; **especially**, bifurcated portions of the needle assembly defining a suture slot with a proximal end and a distal end, the bifurcated portions including a backing arm and a gathering arm that having spaced relationship when the needle assembly is in the retracted state; bends in the gathering arm causing the distal end of the gathering arm to extend away from the backing arm to define a wide passage into the suture slot when the needle assembly is in the extended state and the backing arm and gathering arm have the separated relationship, causing the distal end of the gathering arm to extend toward and contact the backing arm while still maintaining a passage for the suture proximal of where the distal end of the gathering arm contacts the backing arm in order to gather the suture with the passage when the needle assembly is in a partially retracted position.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
